

Corrective Action Log – N. Dream.

Norwegian Dream

USPH Inspection 22. Sept. 03.

Item	Description	Corrective action
1	PROVISIONS: Frozen condensation was noted on the deck of the seafood freezer below the condensation pan.	Corrected. It was addressed by the sanitation supervisor and this area is cleaned on a daily bases.
2	PROVISIONS: Cardboard boxes of the cheese blitzes, English muffins and other ready to eat products were stored in contact with and on the same pallets as raw chicken in the poultry freezer.	Corrected. The freezer with poultry was reorganized so this won't happen again in the future, special attention and training for the provision team was conducted.
3	CREW GALLEY: The hand wash station was marked out of order due to the drain leaking. This was repaired immediately.	Corrected on the spot.
4	FOOD SERVICE GENERAL: The ice machine contained a strip of Styrofoam below the technical compartment beside the icemaker and within the food contact area of the ice bin. These areas should be sealed so that they are easily cleanable and moisture/mold does not accumulate on and within the Styrofoam.	Corrected. Ice machine has been repaired by the reefer eng.
5	CREW GALLEY: Two soup station kettle drains and rubber gasket seals around the lids were soiled with dried food debris.	Corrected, cleaned and special attention will be given by the sanitation supervisor to these areas.
6	CREW / STAFF MESS: The Vitality juice dispensers did not have a dispensing paddle that prevented the lip contact area of the glass from coming into contact with the paddle.	Will be addressed to the manufacturer, Vitality to adjust the dispensing paddles.
7	MAIN GALLEY: Several of the Vitality machines interior dispensing tubes (food contact) were soiled with old juice debris and mold.	Will be addressed to the manufacturer, Vitality.
9	BARS GENERAL: The Hamilton Beach Drink mixers had some peeling paint on the non-food contact areas which could make cleaning difficult.	Corrected.
10	PIZZERIA: The pizza oven was posted out of order. The oven is scheduled to be removed during the next dry dock period.	Pending, will be removed during the next dry dock, October 2004.
